EDUCATION

B.Sc. in Computer Science and Engineering

Southeast University, Dhaka, Bangladesh

CGPA: 3.97 / 4.00

Expected Oct 2026

EXPERIENCE

Research Assistant — Prof. Dr. Dewan Md. Farid

March 2025- June 2026

- Conducting research in Machine Learning, AI, and Data Mining.
- Completed undergraduate thesis under his supervision.
- Published 2 conference papers and contributed to additional research publications.

PUBLICATIONS

- **Thesis: Novel Class Classification using Random Forest and kNN** — Developed a machine learning framework to detect unseen classes using model uncertainty, distance-based methods, and outlier detection.
- A. Rahman, S. R. Liza, A. K. M. Masum, and D. M. Farid, “Scalable K-Nearest Neighbors Classification for Mining Big Data,” in *Proceedings of the 28th International Conference on Computer and Information Technology (ICCIT)*, 2025.
- A. Rahman, Md. S. Babu, M. Hasan, and S. Mahmud, “A Binary Insomnia Disease Classification Approach with Feature Optimization and Explainable AI Insights,” in *Proceedings of the 28th International Conference on Computer and Information Technology (ICCIT)*, 2025.
- A. Rahman, S. Rahman, H.-H. Nguyen, M. M. Hassan, A. K. M. Masum, and D. Farid, “Random Forest with Z-score in Supervised Machine Learning,” in *Proceedings of the International Conference on Intelligent Systems and Data Science (ISDS)*, 2025.
- S. R. Liza, A. Rahman, N. Uddin, M. Nur-A-Alam, and K. M. M. Uddin, “Early Detection of Anemia Using Ensemble Machine Learning Algorithms with Data Balancing,” in *Proceedings of the IEEE International Conference on Quantum Photonics*, 2025.
- M. M. Hasan, A. Rahman, U. M. Jannat, K. Alam, T. Ahmed, and M. H. Bhuiyan, “Multi-Expert EfficientNet Forests with Lightweight Knowledge Distillation for Resource-Efficient Vehicle Classification,” in *Proceedings of the 2026 IEEE Region 10 Symposium (TENSYP)*, Penang, Malaysia, Jun. 2026.

PROJECTS

AI-Enabled E-commerce Platform

Built an AI-powered full-stack e-commerce platform using Java 21, Spring Boot, Spring Security, Thymeleaf, MySQL/JPA, featuring secure authentication, product management, intelligent search, PC recommendations, cart, checkout, and order processing.

Intelligent Inventory System

Built an AI-powered inventory and sales management system using Spring Boot, MongoDB, Thymeleaf, FastAPI, and Random Forest for role-based dashboards, demand forecasting, and restocking recommendations.

Student Management System

Developed a role-based student management desktop application using JavaFX, FXML, JDBC, and MySQL, supporting user administration, course assignment, marks, grades, payments, waivers, and academic records.

LEADERSHIP & ACTIVITIES

- **Vice Chair (Current)** — IEEE Computer Society SEU Student Branch Chapter
- **Executive Committee Member & Webmaster (2025)** — IEEE Computer Society
- **Advisor (Current)** — Southeast University Computer Club

AWARD, HONORS & COMPETITIONS

- **Champion, Poster Presentation competition at Techathon Nationals & Rovers Summit 2026**
- **Second Runner Up, Bangladesh National Round World Sustainable Development Goals Challenge 2026**
- **Finalist, International Round, World Sustainable Development Goals Challenge 2026**
- **Participated in ICPC Dhaka Regional Contest 2025**
- **Finalist, Research Symposium 2.0 National Abstract Competition**

TECHNICAL SKILLS

Languages: C, C++, Java, Python

Frameworks: Spring Boot, JavaFX, scikit-learn, PyTorch

Database: MySQL, MongoDB

Domains: Machine Learning, Deep Learning, Federated Learning, Computer Vision
